LITTLE CHUTE LOCKS AND DAM, SANITARY BUILDING AT LOCK 2

HAER
WIS
44-LITCH,
2E-

HAER NO. WI-88-E

Location: The sanitary building at Little Chute Lock 2 is located east of the lockkeeper's residence, northeast of the guard lock, in the SE1/4, Section 21, T21N, R18E, Civil Town of Vandenbroek, Outagamie County, Wisconsin.

UTM: 16/394930/4903210; USGS Quadrangle: Kaukauna, Wisconsin 7.5' series

Date of Construction: 1976

Engineer: United States Army Corps of Engineers with Contractors

Architect: United States Army Corps of Engineers with Contractors

Present Owner: United States Army Corps of Engineers

Present Use: Toilet and washing facilities for lock personnel.

Significance: The sanitary building serves as part of the daily operation of the Little Chute Locks and Dam Complex.

Project Information: This documentation was undertaken in 1995 in accordance with requirements detailed in a June 19, 1994 letter from Gregory D. Kendrick, Chief, History Branch, NPS to Dale Monteith, Acting Chief, Planning Division, USACOE, Detroit District. The Lower Fox system remains basically operational but was placed in caretaker status by the USACOE in 1982. The USACOE plans to divest itself of the Lower Fox system as soon as is feasible; therefore, NPS requested this documentation. All documentation conforms to HAER standards.

Dr. John D. Richards, Principal Investigator; Georgia A. Lusk, Patricia B. Richards, and Robert J. Watson, Project Archivists with Great Lakes Archaeological Research Center, Inc.; Joseph Paskus, Project Photographer.

SANITARY BUILDING

A sanitary building is located east of the garage at the Little Chute guard lock. The sanitary building is a rectangular cinder block building constructed on a poured concrete foundation. The building houses toilet facilities. The structure is painted blue with white eaves. The building has an overhanging roof pitched slightly to the rear with a protruding metal pipe capped by a revolving, louvered vent. A single door is located on the left side of the sanitary building on its southern elevation, and narrow horizontal windows are located in each wall.
